TD SYNNEX
Accelerated
Development Program

The TD SYNNEX Accelerated Development Program is invitation-only, with limited placesfor Amazon Web Services (AWS) partners engaged in growing their AWS business. The program helps to build readiness to accelerate on AWS, validate technical direction, prepare to GTM, and supports partners to differentiate their AWS Practice.

The TD SYNNEX consultant will help to optimize partner's offerings, providing the tools to solve their customers' IT and business requirements.

**The Accelerated Development Program advantages:**

Dedicated support. Personalised step-by-step assistance from leading TD SYNNEX experts, offering support and feedback with the required deliverables.

Reduced time. Completion time on the partner path reduced from 12-to-24 months to only 3-9 months.

Personalised guidance. A dedicated TD SYNNEX expert works with the partner throughout the program, identifying those benefits that best fit the partners' situation and adapting the phases to each type of business.

Discover Accelerated Development Program

Accelerated Partner Development is a timebound framework comprising various development milestones for both service and software partners. As such, it is designed to provide AWS partners with a step-by-step process to assist them in advancing their AWS Partner business.

AWS Partner Network (APN) alignment

Technical validation

Go to market (GTM) readiness
